

Recovery Practitioner (various localities)

Our Recovery Practitioners work alongside our Locality Managers to help deliver mental health and wellbeing support offers across Devon. The roles entail a range of responsibilities, from delivering 1:1 emotional support, facilitating psychoeducational courses and support groups, and liaising with colleagues in local primary care network (PCN) and community mental health teams (CMHTs). You will play a pivotal role in working alongside people with mental health challenges to help them navigate their own journey to recovery and positive mental wellbeing.

This particular round of recruitment is focused on roles to deliver group activity in the first instance although this may change depending on future service needs.

We're looking for capacity in the specified geographical areas. Contracts will be offered for 4 hours on a weekly basis to enable set-up, delivery and close down of group sessions along with another member of our team and potentially representatives from other agencies.. There may be additional hours offered on an ad-hoc basis from time to time, in various locations across Devon.

North Devon
